2018 ANNUAL REPORT

A MESSAGE FROM THE CHAIRMAN OF THE BOARD

In 1992, Congress created the National Fallen Firefighters Foundation (NFFF) to honor America's fallen firefighters and assist their families. Over the past 27 years, we have supported thousands of families as they rebuilt their lives. Each year, the Foundation hosts the National Fallen Firefighters Memorial Weekend, the official national tribute to all of our nation's fallen firefighters who have made the ultimate sacrifice. In 2004, our Board of Directors recognized the importance of reducing line-of-duty deaths and injuries by formally adding the prevention of firefighter line-of-duty deaths to the mission of the Foundation.

In addition to the Annual Fallen Firefighters Memorial, the Foundation serves the families of our fallen by hosting an annual Wellness Conference, the Hal Bruno Camps for Children of Fallen Firefighters, and a Young Adults Retreat. Our Scholarship program provides financial assistance to spouses, life partners, children, and step-children of the nation's fallen firefighters so they can achieve their educational dreams.

The Foundation understands, all too well, the impact of a firefighter line-of-duty death. It is important to not only support families and the fire service following a line-of-duty death, but to prevent these tragedies from occurring in the future. As part of this commitment, we continue to develop firefighter training and resources through our Everyone Goes Home® program. In 2018, our newest training program, *Attributes of Leading*, was implemented focusing on leadership and the officer's role in preventing firefighter line-of-duty deaths and injuries. Partnering with the Wildland Firefighter Foundation, we championed the 16 Firefighter Life Safety Initiatives in the wildland firefighting community and are working to develop resources that address the concerns that are specific to those who fight fires in the Wildland Urban Interface. Another significant effort the NFFF is focusing on relates to vehicle accidents, the second highest leading cause of firefighter fatalities. To that end, we are working to support the development of a National Emergency Response policy.

Within this Annual Report, you see myriad ways the NFFF strives to fulfill its mission. This important work cannot be accomplished without our dedicated staff, a devoted group of volunteers who assist in a variety of ways, and our generous corporate partners and donors. Each plays a vital role in achieving the Foundation's mission, and we are grateful for their continued support of our families and the nation's fire service.

Sincerely,

Dennis Compton

OUR MISSION

Our mission is to honor and remember America's fallen firefighters, provide assistance to their families and co-workers, and work to prevent firefighter deaths and injuries.

Since its creation by Congress in 1992, the non-profit National Fallen Firefighters Foundation (NFFF) has developed many programs to fulfill its Congressional mandate. Federal grants and donations from individuals, organizations, corporations, and foundations fund the Foundation's programs.

FIRE HERO FAMILY PROGRAMS

SUPPORTING THE FAMILIES OF AMERICA'S FALLEN FIREFIGHTERS

FIRE HERO FAMILY NETWORK

The Fire Hero Family Network is a group of family members of fallen firefighters who provide peer support to newly-bereaved families.

Members of the Foundation's Fire Hero Family Network provided emotional support and grief information to the surviving family members of 103 fallen firefighters in 2018. Matches are made based on similarities between the newly-

bereaved family members. For example, widows who were pregnant when their firefighter died were matched with widows from previous years who had been pregnant when their firefighter died.

FIRE HERO FAMILY WELLNESS CONFERENCE

Blue Ash, Ohio, April 8 – 10, 2018

Workshops offered a proactive approach to help navigate the grieving process and strategies that could be incorporated into daily life.

“I really enjoyed this conference. There was a great balance of emotional well-being classes and healthy ways to cope with grief.”

HAL BRUNO CAMPS FOR CHILDREN OF FALLEN FIREFIGHTERS

Johnsonburg, New Jersey, June 29 – July 1, 2018

The loss of a parent affects children throughout their childhood.

Campers, ages 4-18, participated in the 2018 Hal Bruno Camps for Children of Fallen Firefighters in New Jersey. In addition to traditional camp fun, campers shared their stories of loss and its impact on their lives. They built connections

and self-confidence, learned coping skills, and processed their own grief. Campers let us know the best part of camp is feeling like they are a part of a community, making lasting friendships, and learning coping skills.

“The camp taught me to be more open and share. They said it would help me feel better, and it has.”

At this year's National Fallen Firefighters Memorial Weekend, the families of the fallen were welcomed during a special dinner by the Foundation and other Fire Hero Families whose loved ones had been honored in previous years. The following day, they met in special groups based on their relationship to the firefighter and learned about the NFFF services. Fire Hero Families also made luminaries, memory boxes, and Christmas ornaments to honor and remember their firefighters. On Saturday evening, everyone gathered on the grounds of the National Fallen Firefighters Memorial for the annual Candlelight Service. A bronze plaque bearing the names of the fallen was officially added to the National Fallen Firefighters Memorial. Simultaneously nationwide, in a profound display of sympathy and support, more than 150 fire departments and buildings and landmarks lighted in red for *Light the Night for Fallen Firefighters*. Additionally, hundreds of churches, fire departments and community groups around the country participated in *Bells Across America for Fallen Firefighters* by tolling a bell in honor of the fallen and their loved ones. Firefighters were honored at the National Memorial Service held on Sunday. Each family received a folded flag that had flown above the National Fallen Firefighters Memorial and the U.S. Capitol, plus a special badge and a rose.

"I am so grateful to everyone who worked to make the Weekend happen. Sometimes it's hard to face what has happened, but you provided the love and support necessary for us to face it safely."

The grief specialist researched local counseling services and provided that information to the family members and co-workers. Follow-up calls were made to offer additional help.

PROJECT ROLL CALL

The program identifies and honors firefighters who died in the line of duty prior to 1981 when the National Memorial was established.

Project Roll Call provides an avenue for fire service families and departments to submit a profile of their loved one or colleague who made the ultimate sacrifice prior to 1981. In 2018, we continued to collect biographies and photos to honor these heroes on our website.

A special section of our Walk of Honor® was dedicated on June 11, 2016, and to date, thousands of bricks have been placed to honor these firefighters. The Foundation continues to work with state fire service organizations to purchase and place these bricks.

FIRE SERVICE PROGRAMS

SUPPORTING AMERICA'S FIREFIGHTERS AND PREVENTING LINE-OF-DUTY DEATHS

Fire Service Programs is responsible for providing training and education to the nation's firefighters. These offerings are aimed at reducing the incidence of preventable line-of-duty deaths in the fire service. Programs are based on the 16 Firefighter Life Safety Initiatives. They are delivered through a combination of instructor-led and online learning opportunities. Instructor-led programs are provided by Everyone Goes Home® Advocates, while online training can be found

at the Fire Hero Learning Network (fhln.net) platform. In addition, our Local Assistance State Teams (LAST) assist fire departments when a line-of-duty death occurs and the Taking Care of Our Own® program provides a template for how a fire department can best prepare for a tragedy. Each of these missions is carried out by a dedicated group of staff and volunteer Advocates who are committed to reducing preventable line-of-duty deaths.

EVERYONE GOES HOME® ADVOCATES

The Everyone Goes Home® Advocate program is the backbone of the National Fallen Firefighters Foundation's Fire Service Programs.

Everyone Goes Home® Advocates come from all disciplines and ranks of the fire service. They deliver training programs and serve as the day-to-day face of the Everyone Goes Home® program. The cadre of over 150 dedicated members are available to answer questions or provide training as needed to reinforce our mission to reduce preventable line-of-duty deaths and injuries.

In 2018, we saw the culmination of a dedicated effort to elevate the Everyone Goes Home® message in the State of Florida. Through the enthusiastic work of our Florida Advocate Mary Ellen Harper, the Bureau of Fire Standards and Training (BFST), the Office of the State Fire Marshal, and Advocate Manager Rick Best, a stronger partnership has been forged between the Florida fire service and the National Fallen Firefighters Foundation. Our training programs are now part of the Florida State fire training curriculum and a concerted recruitment

effort is underway to increase the number of advocates and instructors in the state. We are excited about the partnership with Florida Bureau of Fire Standards and Training and the opportunity to reach the entire Florida fire service. We intend to use this same model to increase awareness and messaging in other states as we update existing Memorandums of Understanding (MOUs) and establish new partnerships with other states.

FIREFIGHTER LIFE SAFETY INITIATIVE 8

Utilize available technology wherever it can produce higher levels of health and safety.

Five Key Focus Areas:

CATALYZE CORPORATE INVESTMENT

Promote the demand for fire service technology research and development.

ENGAGE STAKEHOLDERS

Offer design input during development and propose research of new technologies.

DEVELOP TECHNOLOGY CHAMPIONS

Identify and foster champions for research, development, adaption, education, and use.

ENGAGE IN TECHNOLOGY ADVOCACY

Increase the use of technology in firefighter education and training.

BUILD SAFER COMMUNITIES

Advocate for the integration of emergency response into the design of Smart Cities.

The research, development, dissemination, and consistent use of new technologies will be key to achieving significant reductions in preventable line-of-duty injuries and fatalities. We have assembled an advisory panel of subject matter experts, researchers, and fire service leaders to guide our efforts related to Firefighter Life Safety Initiative 8. This panel met for the first time in November in Chicago and identified five key areas as their focus. They will meet again in the spring to plan the next major national technology-related event, to be held September 24 - 26, 2019, in Philadelphia.

FIREFIGHTER LIFE SAFETY INITIATIVE 11

National standards for emergency response policies and procedures should be developed and championed.

In May, we brought together a group of subject matter experts in Columbus, Ohio, to review the current status of response policies across the United States. Attendees identified a need for standardization, noting that one of the causal factors often cited in preventable line-of-duty deaths is the lack of a policy or procedure in place or the failure to follow an existing policy. They encouraged the development of a NFPA standard that will organize and bring structure to response policies within fire departments and jurisdictions from across the nation.

Following up on a recommendation from the Columbus meeting, representatives of the major fire service constituency organizations met in October to explore joint advocacy for such a national response policy standard. They concurred with the Columbus group, and proposed development of a guide that will reference relevant NFPA standards and highlight best practices from progressive departments and response coalitions.

**RECOMMENDATIONS HAVE BEEN COMPILED INTO A
NEW PROJECT INITIATION FORM, TO BE SUBMITTED TO THE NFPA IN 2019**

EVERYONE GOES HOME® IN THE WILDLAND

A partnership with the Wildland Firefighter Foundation helps to bring the 16 Firefighter Life Safety Initiatives to the wildland firefighter community.

The National Fallen Firefighters Foundation is actively engaged in bringing the 16 Firefighter Life Safety Initiatives to all firefighters who respond in the wildland and wildland-urban interface environments. This includes not only the personnel from national, state, and local natural resource agencies that we normally think of as “wildland firefighters,” but also responders from career and volunteer departments with wildland fire responsibilities.

In September, we released the summary report from a 2017-2018 needs assessment, which called for the wildland and structural communities to unite. The ability of “blue shirts” and “yellow shirts” to work together and better understand each other’s training, tactics, and mission will result in safer operations. We have taken the lead in facilitating this interaction, supported by the Wildland Firefighter Foundation (WFF). WFF has proved to be a key partner in promoting Everyone Goes Home® to the wildland community through their media channels, and among crews on the fireline.

In 2018, Everyone Goes Home® in the Wildland focused on building broader engagement, awareness, and credibility within the wildland community. Foundation leaders attended two significant conferences of the International Association of Wildland Fire and presented to the Wildland Fire Leadership Council in Washington, D.C. Related articles were also published in the major wildland fire journals. Everyone Goes Home® Advocates with wildland firefighting experience and expertise are helping us expand our audience by presenting at trade shows and events.

We will continue to adapt existing training and resources to increase their relevancy within the wildland community. Other related future efforts include addressing risk assessment in the wildland and developing an introductory training for the Fire Hero Learning Network that will provide structural firefighters with the basic knowledge they need to stay safe when responding to wildland fire.

“The Fire Hero Learning Network continues to evolve in response to the needs of the fire service and the NFFF’s mission to prevent preventable line-of-duty deaths. Two new modules were launched in 2018 (Automatic Fire Sprinkler and Alarm Systems and Responding to Violent Incidents) in a continuing effort to promote firefighter safety. In addition, work is underway to further enhance the platform with additional programs aimed at improving safety and survival in the wildland and wildland urban interface disciplines.”

We have been working to assure that the 16 Firefighter Life Safety Initiatives are in as many National Fire Protection Association training standards as possible. We accomplish this by sponsoring membership to the various Technical Committees with standard oversight. To date, we have representation on technical committees that oversee 20 training and operational standards.

A program evaluation was completed for the Taking Care of Our Own® program. The evaluation included a review by a group of subject matter experts to ensure program relevance and information was still on point with the Foundation principles. The updated presentation has been rolled out and is receiving positive feedback from attendees.

A new instructor-led program was added in 2018. **Attributes of Leading** is a 7-hour delivery using a combination of short video vignettes and instructor facilitated discussion. The program focuses on six core leadership qualities that are discussed in small group settings like an officer development class or firehouse kitchen table.

Six Core Leadership Qualities:

COMPETENCE

GRIT

BEING WELL

HUMILITY

TRUST

SELF-REGULATION

to implement this training
into our department.”*

*“One of the most
impactful
classes I have taken.”*

LOCAL ASSISTANCE STATE TEAM PROGRAM

Teams provide critical services and support to families and departments who have suffered a line-of-duty death.

The Foundation trains fire departments to prepare for a line-of-duty death through the Taking Care Of Our Own® (TCOOO) program and provides immediate support to departments and families of fallen firefighters by the Local Assistance State Team (LAST) program. The LAST program is funded by the Department of Justice (DOJ) – Bureau of Justice Assistance. The program’s primary mission is to assist families and departments in preparing Public Safety Officers’ Benefits (PSOB) claims after a line-of-duty death. While the principal focus is to oversee the accurate and timely submission of these claims, the program also offers immediate logistical, administrative and emotional support after a fatality. Support may include funeral and memorial service planning, logistical assistance with benefits administration, and connect surviving co-workers and immediate families with behavioral health resources.

The LAST participated in the implementation of the new automated PSOB 2.0 submission process which is a secure web-based system, completely paperless. This user-friendly system makes it easier to submit the PSOB claim, track its progress, make inquiries regarding benefits and receive communications from the PSOB office. The system has eliminated many documents that had been required with each claim submission making it much easier to submit. Training was provided to all Local Assistance State Teams on the new PSOB web-based system at two regional training classes to ensure all members are prepared to assist families and departments in submitting the PSOB claims. The national PSOB office Director participated in all training sessions across the country.

WALK OF HONOR[®]

During 2018, 578 bricks were placed into the Walk of Honor[®] bringing the total of engraved bricks to more than 14,600.

To help sustain the National Fallen Firefighters Memorial Park, bricks can be ordered in honor of fallen firefighters or to commemorate a significant event in the life of a firefighter still

-serving their community, such as a promotion, retirement, birthday or holiday gift. Members often purchase bricks in honor of their departments or co-workers.

RAISING AWARENESS – FOUNDATION MARKETING

Effective communication is vital to fulfilling the Foundation’s mission.

The National Fallen Firefighters Foundation continues to find new ways to build our relationships and reach a broader audience both in and outside of the fire service. Our social media presence continues to expand through Facebook, Instagram, Twitter, YouTube, LinkedIn and Pinterest. We provided live coverage of several events through Facebook Live, including our Fire Hero Family Tree Lighting. We continue to distribute our online quarterly newsletter, *The Foundation Trumpet*, to provide up-to-date Foundation news and events to our subscribers. The Marketing team attended several trade shows, fundraisers, and meetings, reaching out to thousands around the country, distributing our marketing materials, and working with the media.

During the 2018 National Fallen Firefighters Memorial Weekend, our Marketing and Communications team was once again joined by an outstanding group of volunteers. The Candlelight and Memorial Services were live-streamed through VISTA Worldlink’s generous donation of equipment, facilities and expertise. Comcast also provided technical assistance and equipment. These donations allowed for media outlets, fire departments and individuals across the world to share these memorable events. Working closely with major landmarks, buildings, fire departments and churches across the country, allowed for our *Light the Night for Fallen Firefighters* and *Bells Across America* to once again help us honor our fallen heroes during the National Fallen Firefighters Memorial Weekend.

EVENTS & CAMPAIGNS – SUPPORTING THE MISSION

Events and other fundraising campaigns continued to raise much needed funds for the Foundation.

Our trade show events included Stop, Drop, Rock 'n' Roll at FDIC and Boot Scootin' Boogie during Firehouse Expo. The Foundation partnered with Carry the Load to raise awareness and funds over the Memorial Day weekend. We returned to Dover International Speedway for The Second Annual Smoke House. Dedicated volunteers also held 51 fundraising events around the country. In 2018, we continued to partner with companies who support the mission of the Foundation.
